

'Benchmark' Machine Learning

Machine Learning in the 'wild'

Bridging the gap between 'textbook ML' and 'real ML'

requires* new tools & theory for

manipulating multiple heterogeneous noisy data sources

**among many other things*

A Tale of Two Fields

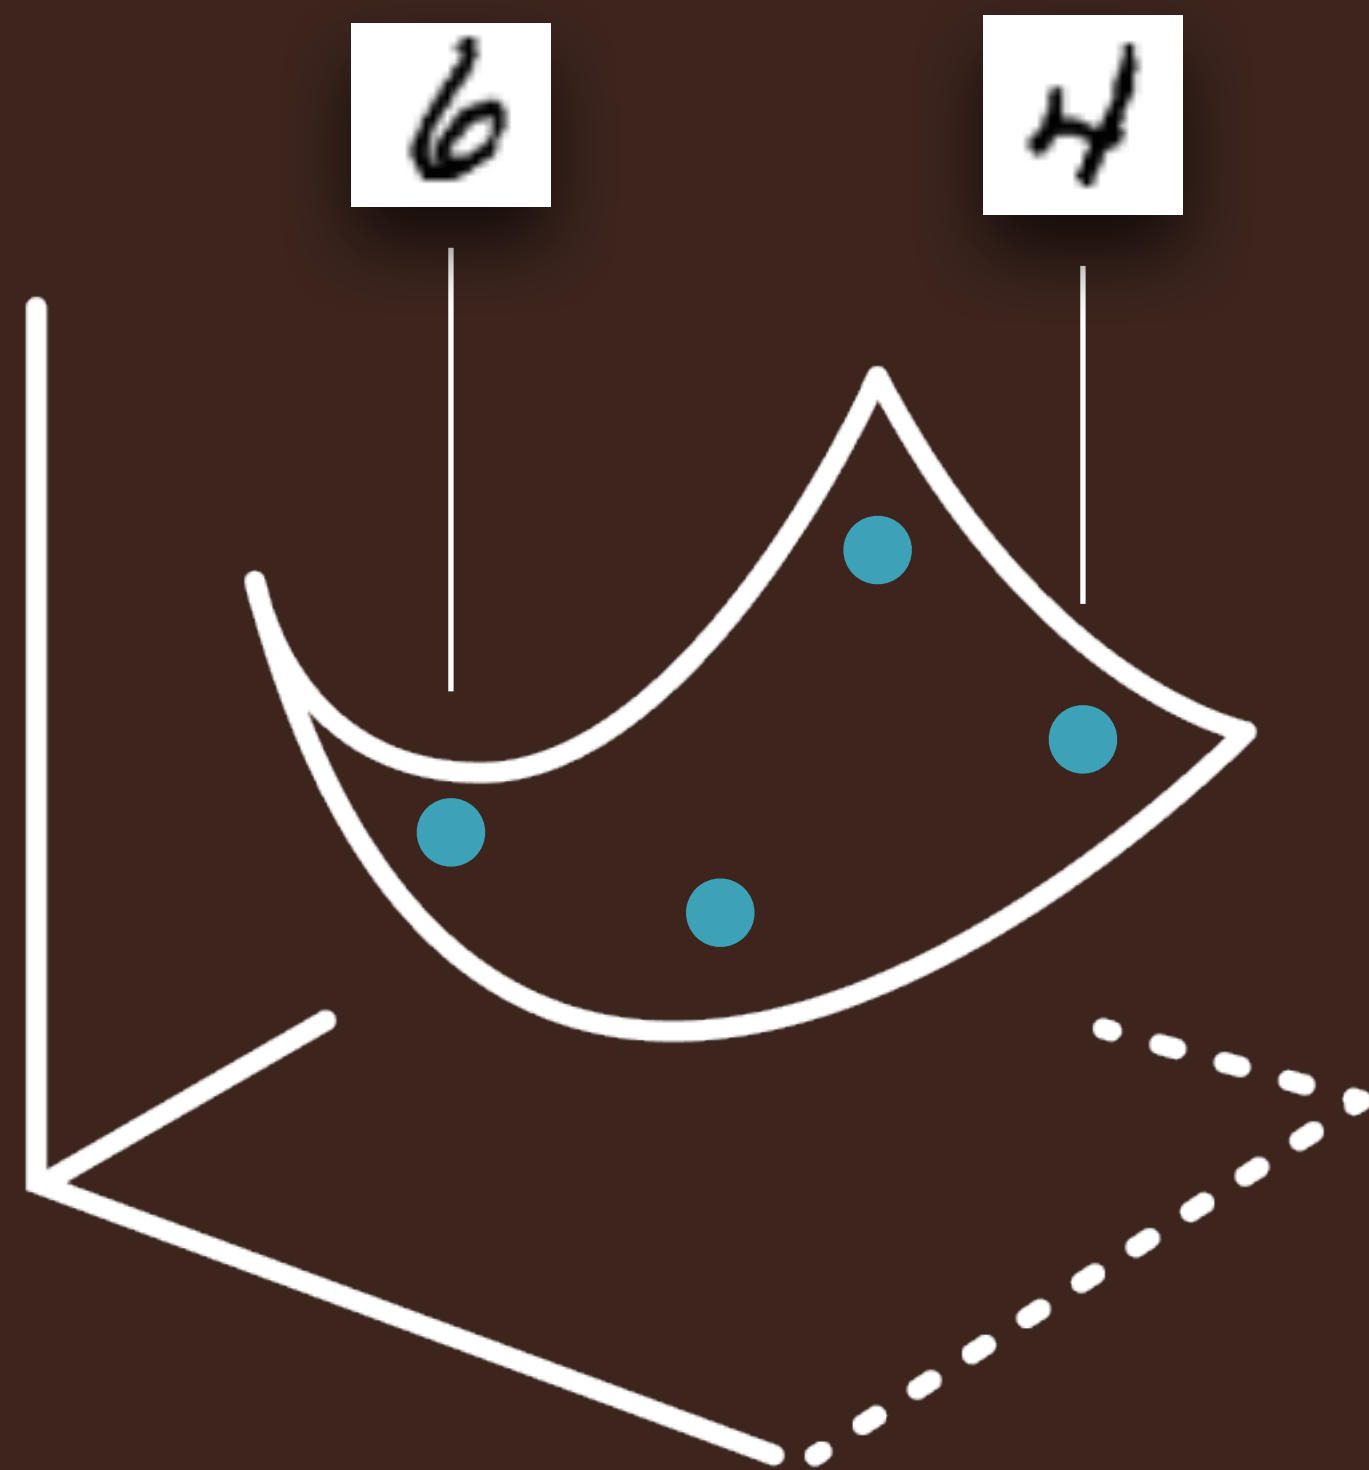

Bridging the gap between 'textbook ML' and 'real ML'
requires* new tools & theory for
manipulating multiple heterogeneous noisy data sources

**among many other things*

'Benchmark' Machine Learning

Machine Learning in the 'wild'

Learning in The Space of Datasets

Classic ML:
Space of Datapoints
