

Interactive Demo: Sinkhorn

1. Implement pairwise distance function
2. Implement Sinkhorn's algorithm
3. Verify feasibility of solution + visualize

tinyurl.com/cs2840-lecture5

Sinkhorn Algorithm

1. $\mathbf{K} \leftarrow \exp\{-\mathbf{C}/\varepsilon\}$
2. Repeat until convergence:
 $\mathbf{u} \leftarrow \mathbf{a} \oslash \mathbf{K}\mathbf{v}, \mathbf{v} \leftarrow \mathbf{b} \oslash \mathbf{K}^T \mathbf{u}$

Tips: to avoid numerical issues you can:

- Add small values before dividing
- [Even better] compute in log domain

Interactive Demo: EOT
