Summarize

Interpolate

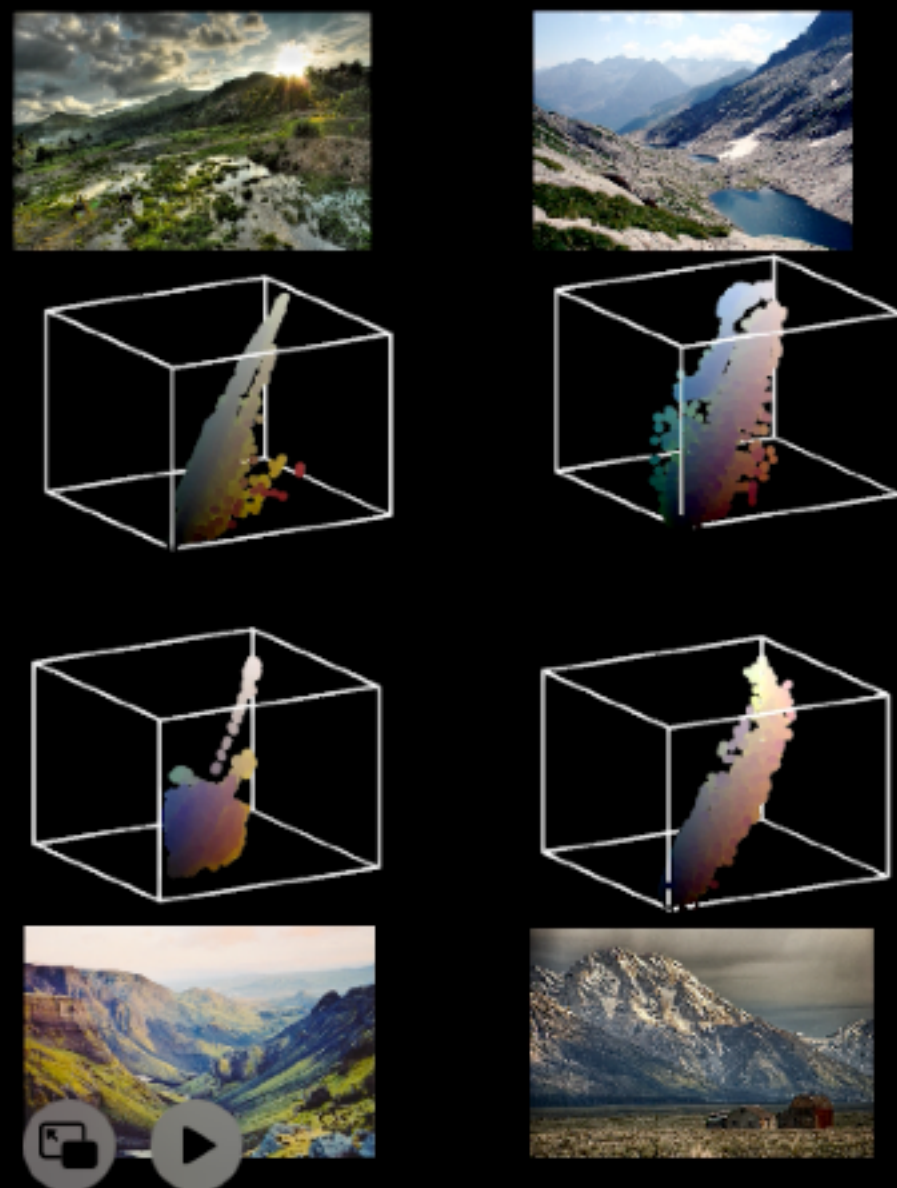

Barycenters in Probability Space

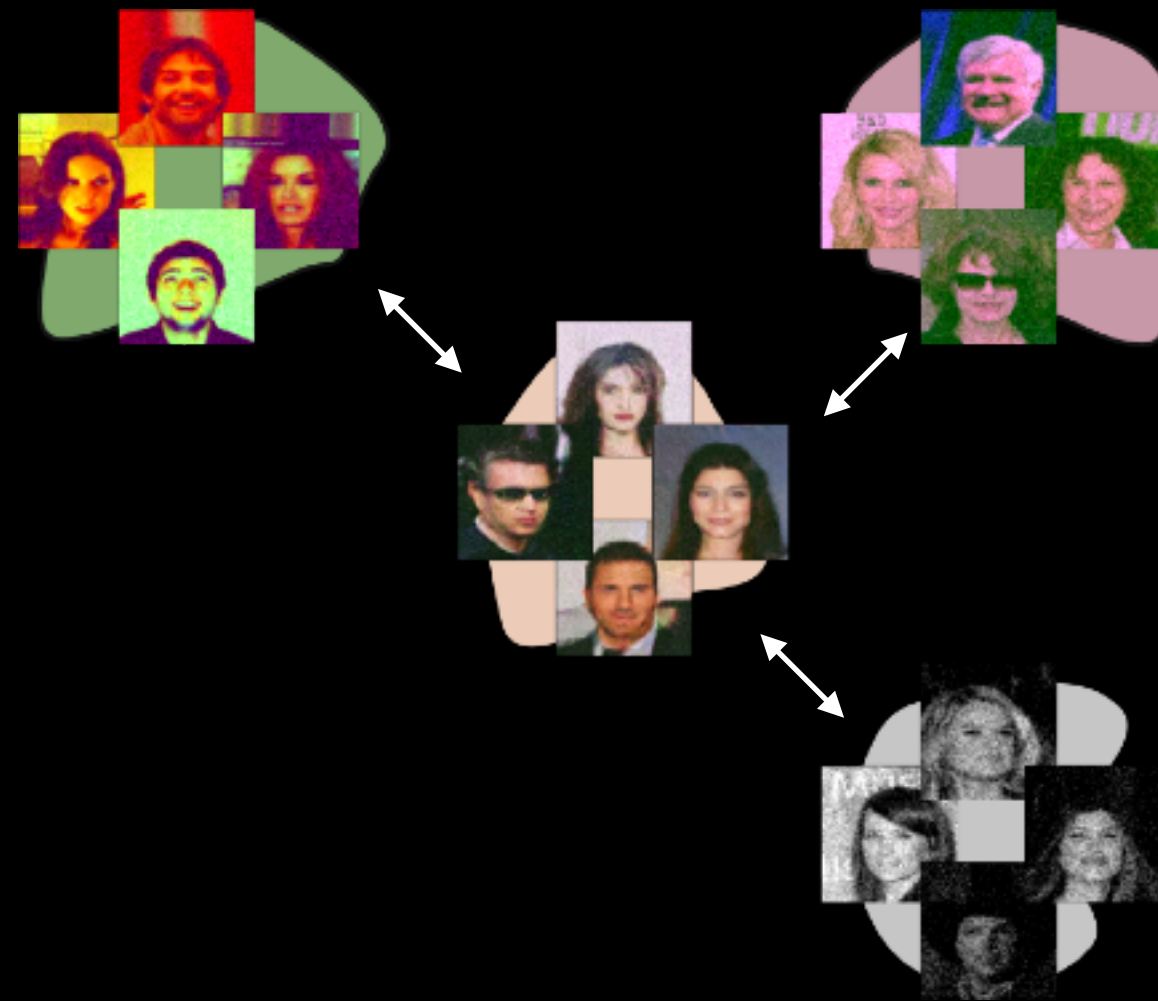

- Why would we need to do this?

Image Color Grading

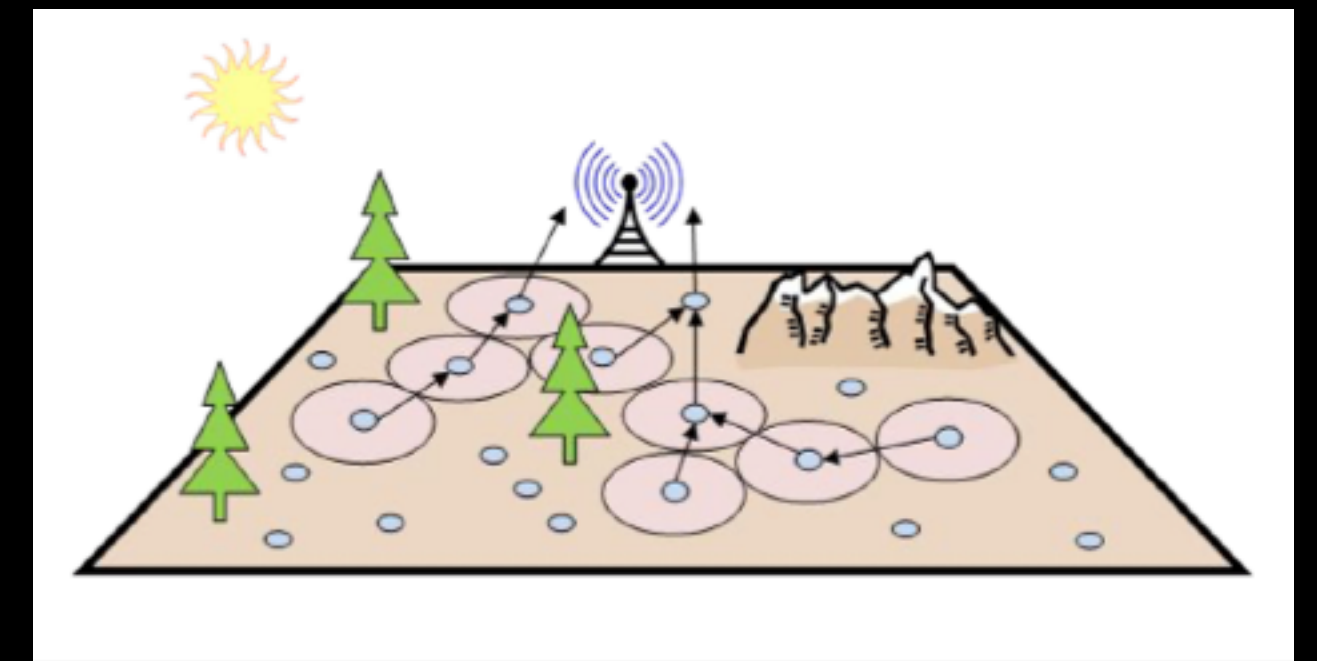

[Boneel et al. 2016]

Dataset Homogenization

[Korotin et al. 2022]

Sensor Data Aggregation

[Vrudhula et al.]

- Just like in Euclidean space, we want to:
 - **Aggregate**: combine multiple domains or clients (federated learning).
 - **Summarize**: compress large datasets into representative averages.
 - **Interpolate**: morph between styles, textures, or modalities.

Barycenters in Probability Space
