

Mid-Semester Feedback

- Please fill out the **short survey**.
- This is a brand-new course – your input will directly shape how it evolves in future years.
- **We're especially interested in hearing:**
 - What's working well so far (lectures, pace, exercises, discussions).
 - What could be improved for the rest of the semester.
 - Any suggestions for topics, examples, or applications you'd like to see.
- Your **feedback will help make the course more engaging**, useful, and enjoyable for you and future students.

Last Time

- **Sinkhorn Divergences** deep dive: motivation, properties, relation to MMD
- **Wasserstein Barycenters**: geometry-aware averages of distributions
