

Time $t=0$, $F(\rho_t)=67.77$

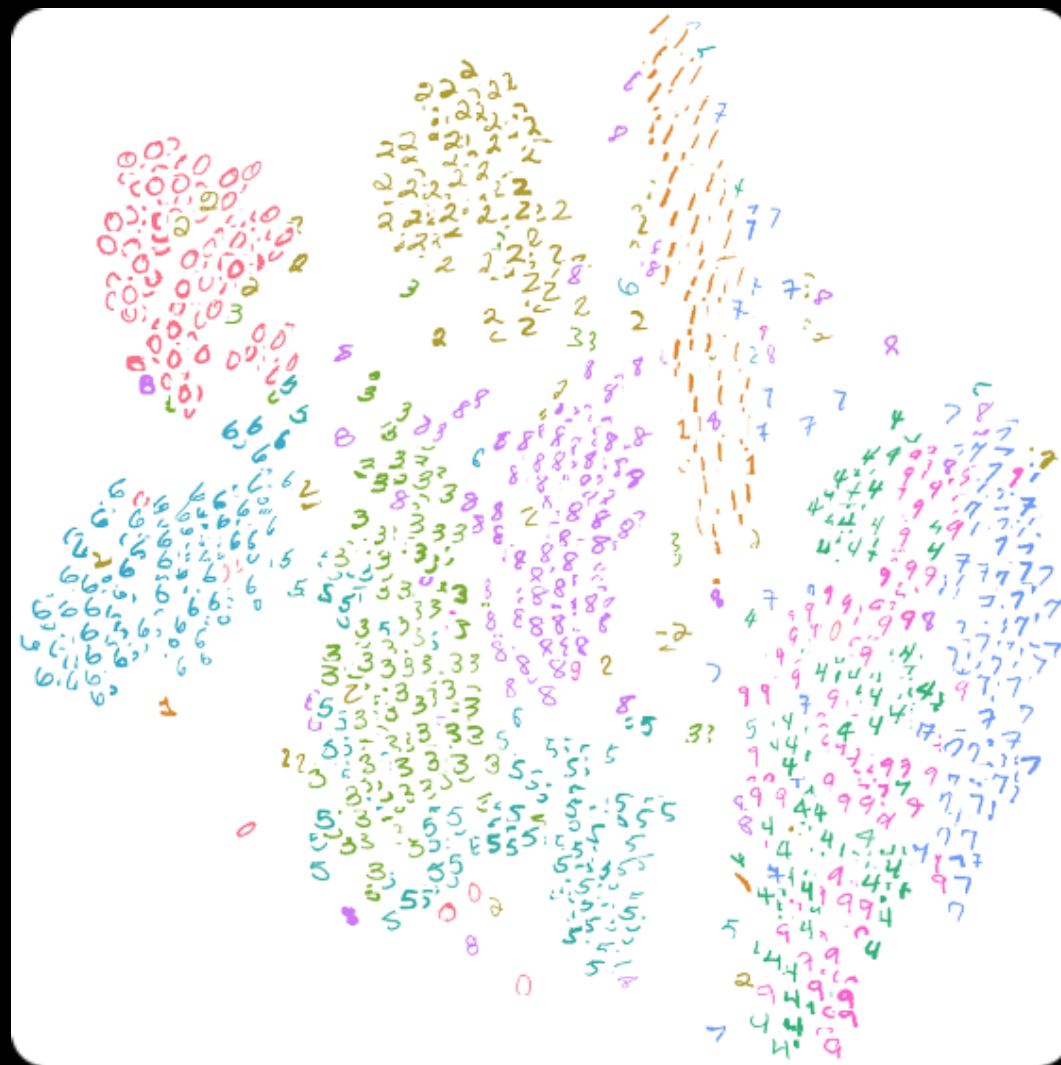

Time $t=0$, $F(\rho_t)=67.77$

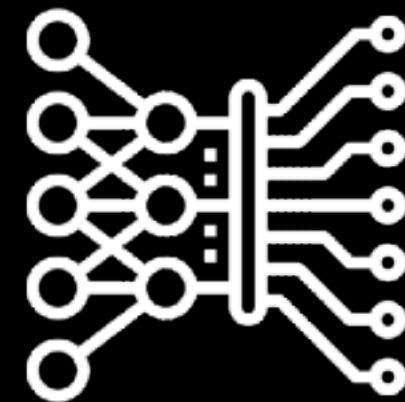

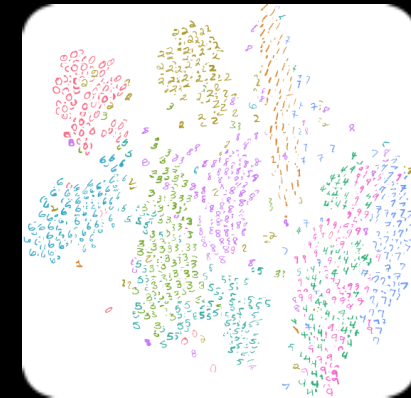

Source Domain

Target Domain

Application: Data-Driven Transfer Learning

Source Domain

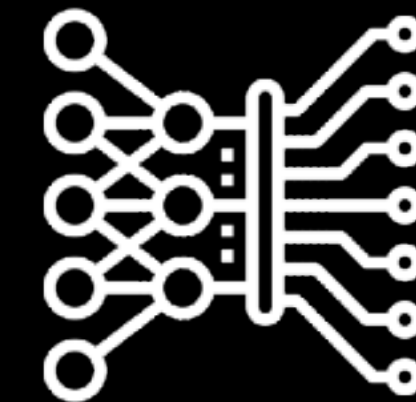

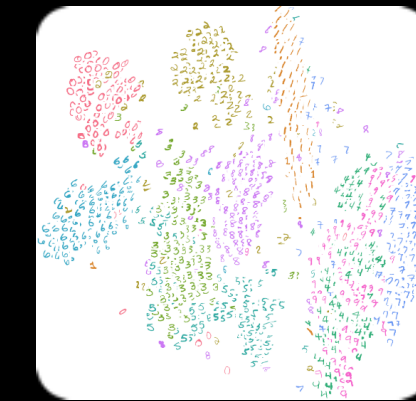

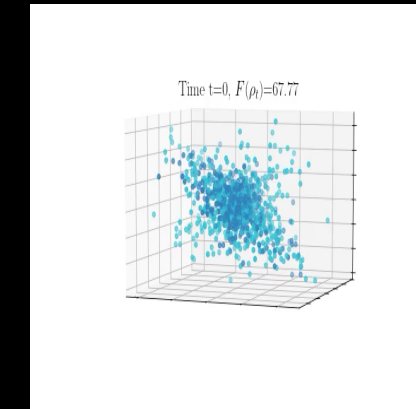

Here: Data-based adaptation

(flow to target, train on flowed)

Usual (model-based) adaptation

(train on source, fine-tune on target)

Target Domain

Application: Transfer Learning

Datasets:

- MNIST USPS KMNIST FashionMNIST

Setting:

- small target dataset (100/class)
- larger source dataset (1000/class)
